# JolSetu — Voice Recording Script

Xylem Global Student Innovation Challenge 2026 · Water Quality · University track · Total narration ≈ 2 min 45 sec in 15 clips

## How to record (5 minutes of setup)

1. **Where:** a small room with curtains/bed (less echo). Fan/AC off. Phone in airplane mode.
2. **How:** phone mic 15–20 cm from your mouth, slightly to the side. Speak like you are explaining to a friend — not like reading news.
3. **Format:** record each clip separately (or one non-stop file — I can cut it). WAV/M4A/MP3 anything is fine. Stay 5 cm still before and after each clip (easy cutting).
4. **Send to me:** WhatsApp/Google Drive. Name them clip-01, clip-02, … (or just send in order). I will clean, time and merge them into the video — the music, screen recordings and subtitles stay as they are.
5. **Timing:** each clip has a target length. If you are a little over/under — do not worry, I auto-fit the visuals to your voice.

## Say it right

| | |
|---|---|
| **JolSetu** | JOL-say-too (“jol” = water, “setu” = bridge) |
| **Araihazar** | ah-roi-ha-zor (the upazila in Narayanganj) |
| **Q R / G P S / A I** | spell the English letters: “kew-arr”, “jee-pee-ess”, “ay-eye” |
| **Numbers** | written in words exactly as they should be spoken — read as written |
| **Dashes (—)** | take a short pause (half a second) |

*— All 15 clips start on the next page. Read each one 2–3 times aloud BEFORE recording. —*

### CLIP 01 · Title — opening (~11 sec)

***On screen:*** *slide: JolSetu title on village photo*

**“JolSetu — the people's bridge to safe water. Xylem Global Student Innovation Challenge twenty twenty six, Water Quality track. By Rudra Sarker.”**

***Delivery:*** *Calm, confident, welcoming. Pause after “safe water”. Say “JolSetu” as JOL-say-too.*

### CLIP 02 · The problem (~14 sec)

***On screen:*** *slide: 20M / 24,000+ / US$13B stats*

**“In Bangladesh, arsenic in groundwater is the largest poisoning of a population in history. Twenty million people drink unsafe water — and more than twenty four thousand die every year.”**

***Delivery:*** *Slow and serious. Stress “largest poisoning” and “twenty million”. Short pause at the dash.*

### CLIP 03 · Why nothing changes (~11 sec)

***On screen:*** *slide: Tested once. Misread. Silence.*

**“Ten million wells were tested — once. Results sit on paper, readings are done by eye, and when a well fails, families have nowhere to go.”**

***Delivery:*** *Slightly frustrated tone on “once”. Emphasise “nowhere to go”.*

### CLIP 04 · The data knows (~12 sec)

***On screen:*** *slide: 6,593-well real map figure*

**“But the data already knows. Every dot is a real, laboratory measured tubewell from Araihazar — six and a half thousand of them. More than half are unsafe.”**

***Delivery:*** *Say “Araihazar” as ah-roy-ha-zor. Brighten your tone on “But the data already knows”.*

### CLIP 05 · The four moves (~16 sec)

***On screen:*** *slide: Read / Stamp / Learn / Walk cards*

**“JolSetu closes the loop in four moves. Read — your camera is the instrument. Stamp — Q R signed, G P S verified. Learn — the map learns from every test. Walk — to the nearest safe well.”**

***Delivery:*** *Spell the letters: “Q-R”, “G-P-S”. Punch each verb: READ… STAMP… LEARN… WALK… Take a half-second pause at every dash.*

### CLIP 06 · DEMO — kit reader (~12 sec)

***On screen:*** *screen recording: pad photo → 100 µg/L UNSAFE*

**“Watch. We photograph a one dollar test kit — and JolSetu reads it instantly. A hundred micrograms per litre: unsafe. Spoken aloud, in Bangla.”**

***Delivery:*** *Energetic — this is the wow moment. Say “a hundred micrograms per litre” clearly (it matches the screen). Pause before “unsafe”.*

### CLIP 07 · DEMO — QR check-in (~11 sec)

***On screen:*** *screen recording: honest passes, cheater rejected*

**“Every result is Q R stamped inside a thirty metre G P S fence. Honest check in — passes. Cheater, five hundred metres away — rejected.”**

***Delivery:*** *Playful contrast: say “passes” bright, “rejected” firm and final.*

### CLIP 08 · DEMO — live map route (~10 sec)

***On screen:*** *screen recording: route to safe well*

**“The live map plots every real well. Press route — distance, direction and walking time to the nearest verified safe well. Even offline.”**

***Delivery:*** *Smooth and reassuring. Stress “verified safe well” and “even offline”.*

### CLIP 09 · Depth lesson (~13 sec)

***On screen:*** *slide: depth chart (76% → 11%)*

**“And one life saving lesson: the deeper the well, the safer the water. Seventy six percent of shallow wells are unsafe. Below one hundred fifty feet — just eleven percent.”**

***Delivery:*** *This is the wisdom moment — slow down. Big contrast between “seventy six” and “eleven”.*

### CLIP 10 · Human eyes vs AI (~12 sec)

***On screen:*** *slide: 943 kit-vs-lab scatter*

**“Human eyes are the weak link. In nine hundred forty three real comparisons, people wrongly condemned thirty seven percent of safe wells. A I reading fixes that.”**

***Delivery:*** *Say “A-I” as letters. Stress “wrongly condemned” — that is the tragedy AI removes.*

### CLIP 11 · The learning loop (~11 sec)

***On screen:*** *slide: model → queue → tests diagram*

**“This map learns. The model finds where it disagrees with the data, and sends testers there next. Every test makes the whole map smarter.”**

***Delivery:*** *Upbeat, intelligent tone. Emphasise “learns” and “smarter”.*

### CLIP 12 · Impact (~14 sec)

***On screen:*** *slide: $11 / 18 years / 94M cards*

**“The impact is proven. Eleven dollars per person switches a family to safe water — and ninety four million people across the arsenic belt are waiting.”**

***Delivery:*** *Confident. Pause at the dash; lift your voice on “ninety four million”.*

### CLIP 13 · Xylem fit (~11 sec)

***On screen:*** *dark slide: last mile of water quality*

**“For Xylem, this is the last mile of water quality. Every kit becomes a sensor, every phone a reader — twenty million measurement points, measuring themselves.”**

***Delivery:*** *Business-like, steady. Enjoy the phrase “measuring themselves” — smile while saying it.*

### CLIP 14 · Roadmap (~8 sec)

***On screen:*** *slide: 8-week timeline*

**“Eight weeks from pilot to proof: schools, kits, a verified public ledger — and a published impact audit.”**

***Delivery:*** *Crisp and fast-paced — momentum. One breath is enough.*

### CLIP 15 · Closing (~10 sec)

***On screen:*** *dark slide: Join us on the bridge + links*

**“Twenty million people don't need another warning. They need a bridge. JolSetu — join us. The demo is live, today.”**

***Delivery:*** *Slow. Powerful. Pause after “warning” and after “bridge”. End strong, not fading.*

### Clip timing summary (targets — I auto-fit if you differ)

| Clip | Target | Clip | Target |
|---|---|---|---|
| CLIP 01 | ~11 sec | CLIP 02 | ~14 sec |
| CLIP 03 | ~11 sec | CLIP 04 | ~12 sec |
| CLIP 05 | ~16 sec | CLIP 06 | ~12 sec |
| CLIP 07 | ~11 sec | CLIP 08 | ~10 sec |
| CLIP 09 | ~13 sec | CLIP 10 | ~12 sec |
| CLIP 11 | ~11 sec | CLIP 12 | ~14 sec |
| CLIP 13 | ~11 sec | CLIP 14 | ~8 sec |
| CLIP 15 | ~10 sec | | |

*After you send the clips: I clean the audio, sync every clip to its visuals, keep the subtitles, and re-render the final video with YOUR voice — then show you before any submission.*
